

Thank You

Thank you for selecting the Simtrecs product! This pedal set is designed for SimRacing and uses top quality parts for durability. To get the most out of your new pedal set, please read this manual carefully before you start using it. This instruction manual is designed to be easy to understand by showing examples. Simtrecs would like you to enjoy using your new pedal set. If you have any issue or need help to setup your ProPedal, drop us an email and we will do our very best to support you.
